

e-Procurement Automation

Transform your spend visibility, oversight, and ensure compliance

Glantus provides purchase requisition automation to transform manual procurement processes into data-driven strategic e-Procurement. This provides your business with an end-to-end view of the entire procurement processes, with embedded spend approval workflow, compliance and budget controls.

Removing outdated, laborious, and manual processes is the baseline for setting up an efficient and intuitive purchase requisition system for modern businesses. Achieving effective transformation of the procurement function delivers significant time and cost savings, but most importantly control and visibility over business spend. Using Glantus, these efficiencies and cost savings are delivered quickly and without interrupting key business processes.

Glantus enables 360-degree visibility across your entire e-Procurement process, giving peace of mind that every user's purchasing journey is traceable, accountable and compliant.

Our effective toolkit quickly and painlessly automates your purchase requisition function presenting key metrics & analytics. We can also enable a truly end-to-end Procure-to-Pay system tailored for your organisational needs by combining e-procurement Automation with our Invoice Processing Automation software capability.

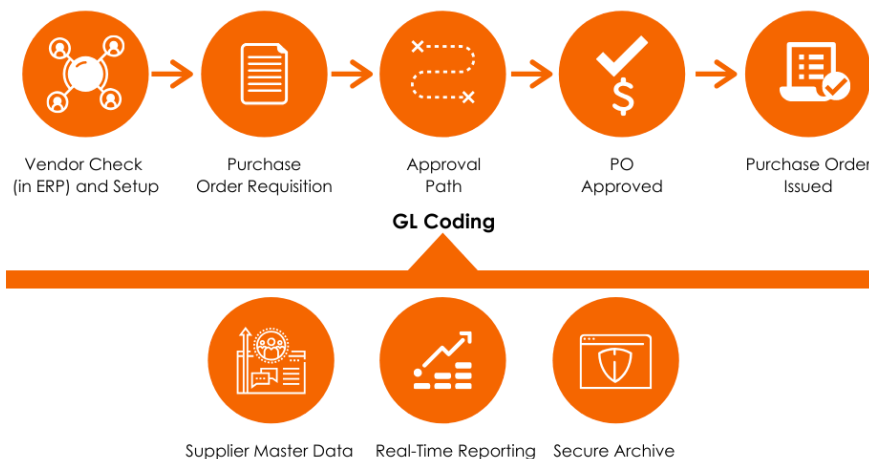

With Glantus, you gain access to deep cross-functional AI knowledge and proven processes, all powered by the Glantus Data Platform. Our goal is to transform how financial processing operates and give the future of financial reporting with real-time data intelligence.

BENEFITS

- Replace the manual, error prone, labour-intensive tasks of purchasing with automated efficient e-Procurement.
- Liberate staff to maximise their efficiency, keeping them motivated, productive, in-line with spend budget and growth-orientated
- Minimal disruption for staff and systems, as we manage the procurement process entirely - without interrupting key ongoing business
- Transparency at all stages, compliant and audit-ready, vastly reduce errors and fraud risk
- Save money on outdated and possibly erroneous methods

Empower your team to procure what is needed in a visible and efficient manner. The Glantus solution empowers users to minimise costs and achieve better pricing from approved suppliers. You control all spend, leaving your organisation more compliant, efficient and focused on revenue-generation.

HOW IT WORKS

Purchase Requisition Automation

A smart, automated purchase requisition system improves visibility and oversight. Glantus generates quick and demonstrable ROI and increases efficiency, while reducing risk throughout the organisation.

FEATURES

- Web-based solution – minimal disruption with integration simplified
- Create, code, track and approve purchase requests, spend management with preferred and approved supplier.
- Improve supplier management with full audit trails, contract and access management throughout the process.
- Easy integration – with any ERP solution or finance application
- Fully compatible with our Invoice Processing solution for a completely end-to-end P2P solution.

THE GLANTUS DIFFERENCE

Automating key processes such as purchase invoice capture, statement reconciliation, 2-way and 3-way PO transaction matching, payments, etc brings control. But when combined with the application of technologies such as AI, RPA, and predictive analytics, this control becomes transformational. Glantus software solutions are designed for organizations seeking to harness financial data from large volumes of transactional data, often across multiple systems and disparate information sources.

We automate and simplify finance practices, massively reducing risk. Using e-procurement, Purchase Invoice Automation, Purchase Ledger Process management reporting and analytics, we help you realise the hidden value of your financial operations.

Glantus is a global provider of accounts payable automation and analytics solutions. Our award-winning data platform eliminates cost and delivers new revenue streams. We do this by connecting all AP systems and suppliers on one agile platform that unblocks automation initiatives and puts your data to work.

GLANTUS DATA PLATFORM

Software solutions are powered by the unique Glantus Data Platform which includes out-of-the-box connectivity to financial and related internal systems.

Modules can be licensed separately or as part of an integrated system. Robust data analytics is combined with stunning data visualization to give you the accurate and valuable business intelligence you can trust.

User-friendly predictive analytics puts actionable insights into the hands of business users
