

# DATA MADE SIMPLE

Integrate data from any source  
and put it to work with  
the Glantus data platform.

Glantus Ireland is certified and accredited  
ISO 9001:2015 and ISO 27001

# Bottom-Line Benefits

Save money, work smarter and discover new opportunities

Glantus is the only data platform with end-to-end features, purpose-built for business results.

## Free Up Resources

95% of time spent on manual processes, eliminated with automation

- **One integrated solution:** Glantus can deliver all analytics, BI
- **Automation everywhere:** Create automation workflows and deploy RPA in every department.
- **Security, sorted:** Integrated data means simplified GDPR and MIFID-2 compliance processes, including automated subject access requests.

## Plan and Predict

50% reduction in write-offs, with predictive analytics

- **Automate intelligent actions** by integrating business processes with outside data sources (such as weather, freight and transport updates, and social behaviour).
- **Make strategic decisions** based on up-to-the-minute, accurate information, with fully integrated dashboards and advanced analytics.
- **Discover new possibilities:** Glantus comes with a fully integrated data science studio and artificial intelligence application.

## Work Faster

75% faster time to deployment than the competition

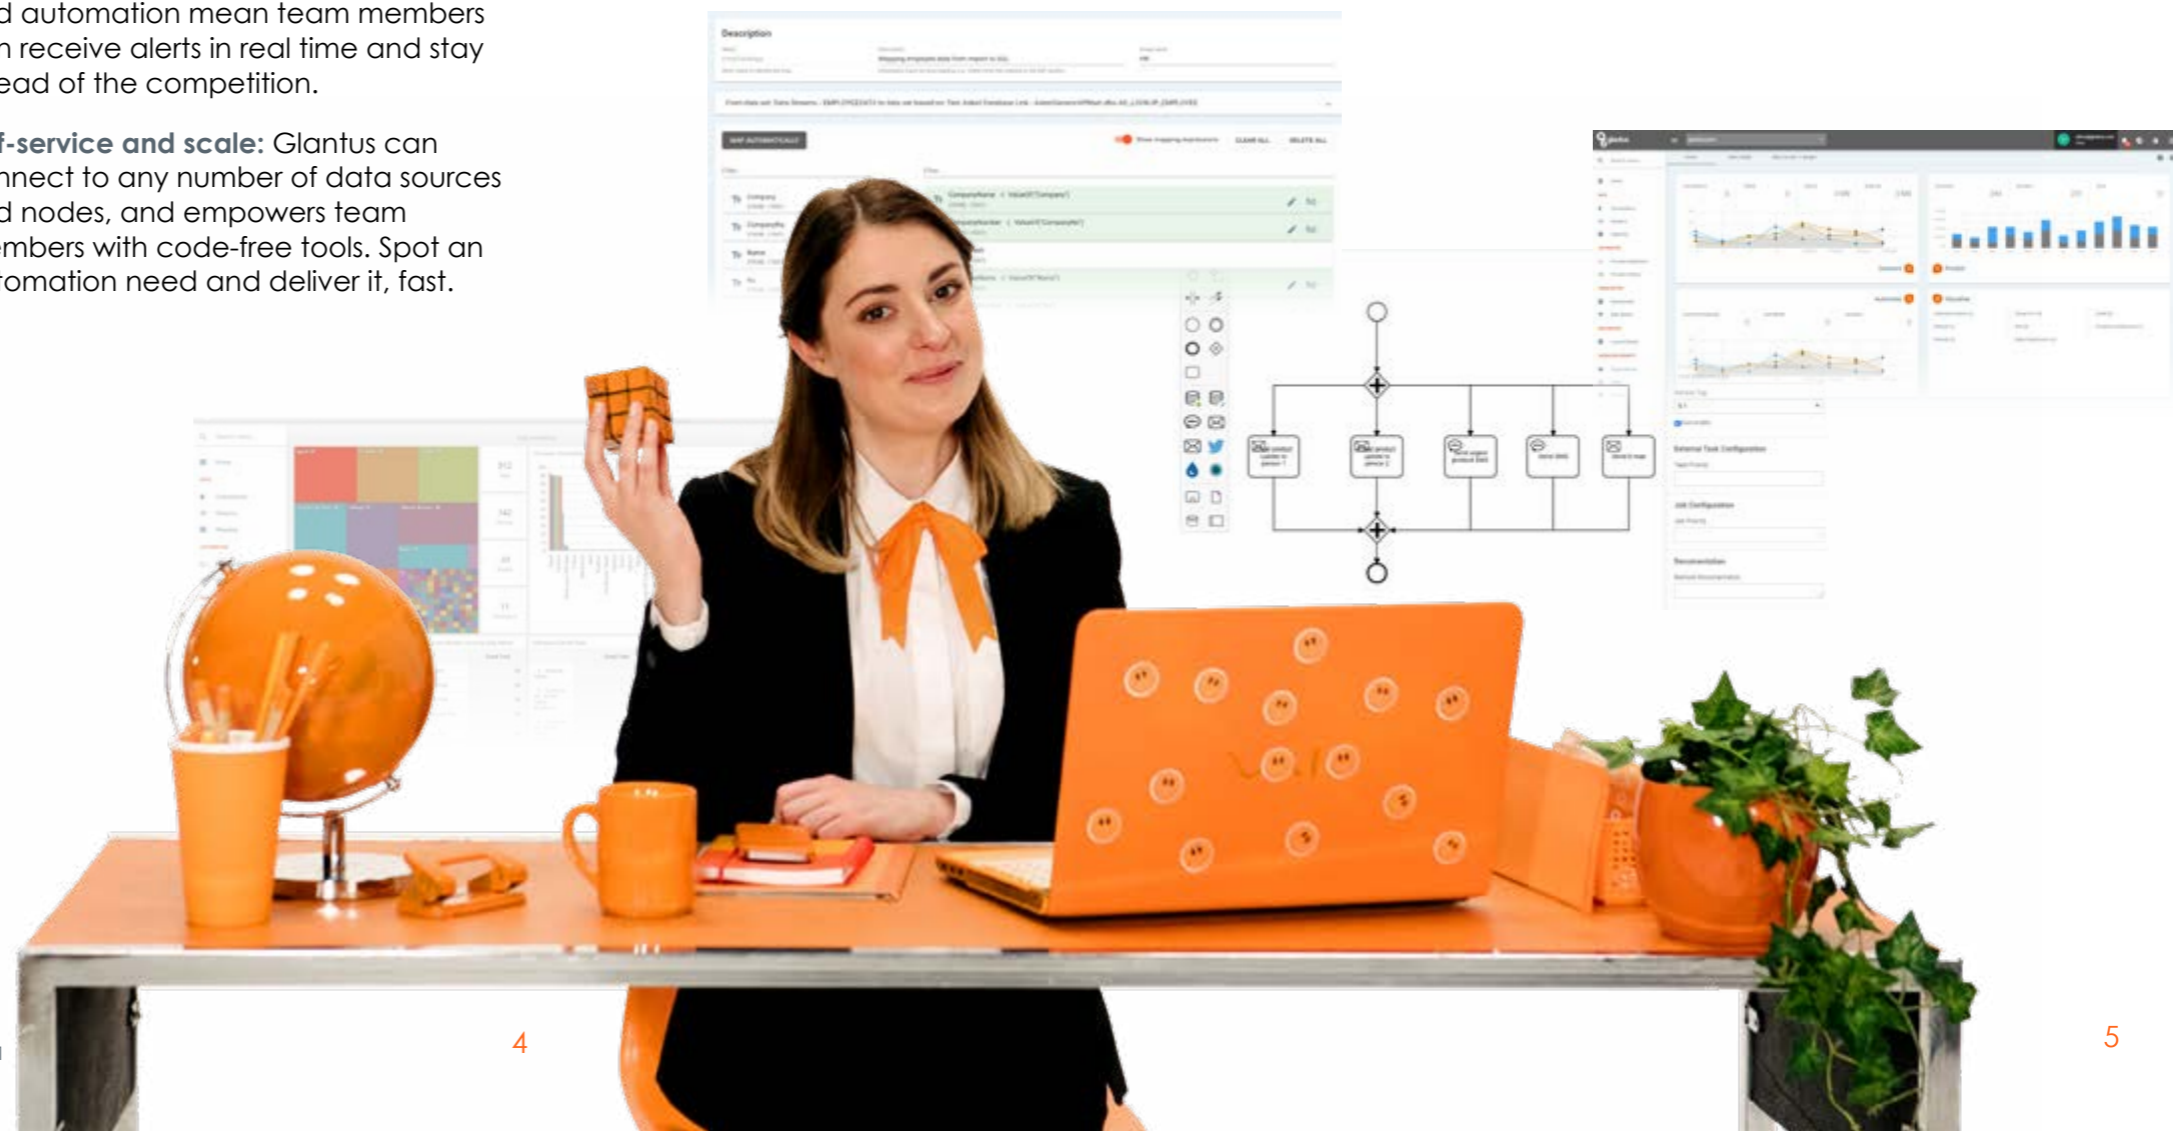

- **Connect and go:** Our integrated approach means data is captured live and in real time: No more costly ETL phases.
- **Actionable insights:** Integrated analytics and automation mean team members can receive alerts in real time and stay ahead of the competition.
- **Self-service and scale:** Glantus can connect to any number of data sources and nodes, and empowers team members with code-free tools. Spot an automation need and deliver it, fast.

# Deploy Fast - Without Disruption

Glantus deploys faster than any competitor, with no costly ETL phase

- Log in anywhere: Desktop, web, iOS and Android.
- Quality-certified support team.
- Live data streaming, powered by Apache Kafka, the engine developed for LinkedIn's messaging system.
- Workflow design powered by open source BPMN, offering a familiar, code-free environment for end users.
- An always growing list of off-the-shelf API integrations, maintained by the Glantus developer community
- ISO-certified quality and security
