## Proof of Concept

What you know, what you don't and what you should.

### Why do a free AP Assessment?

We provide immediate benefits by identifying duplicates, allowing you to quickly recover cash back to your business. The POC can provide you with an instant ROI before you even purchase!

Best practices like an AP Assessment Report are crucial for managing risk. Examine your existing AP technology, controls, and policies/procedures to identify gaps, mitigate potential risks and establish proper controls.

After a simple data extraction from your ERP system, we help you understand the data trends within your organisation and suggest areas for improvement. Often overlooked, fluctuations and spikes are important red flags, usually revealing a procedural weakness that has a larger impact than it appears.

### What We Uncover

Our assessment report allows you to see how to compare to other best-in-class companies.

- Vendor Master File Assessment
- Invoice Sizing, Days to Process, and Payment Terms Analysis
- Fraud Detection and Prevention
- Duplicate Payments...and more

#### INSIGHT

You will gain valuable insight into your potential overpayments.

#### REVIEWS

You will be provided with full details of an example set of duplicates for your team to review.

#### FULL ACCESS

Full access to DataShark means you can use all reports and features for a period of 2-4 weeks.
